SUPERVISOR	Dr. Suzan Farahat
SOURCE MATERIAL	Project Proposal.pdf, Trace Presentation.pdf (Brand Identity & Strategy Presentation)

Understanding Microplastics. Taking Action.

THE TAGLINE, IN FULL

Understanding Microplastics. Taking Action.

6.1 Logo

- **Primary lockup:** wordmark “TRACE” with the particle-core arch “A”, paired with the tagline “Understanding Microplastics. Taking Action.”
- **Icon-only mark:** the arch “A” alone, for favicons, app icons, and social profile images.
- **Minimum clear space:** equal to the height of the letter “T” in the wordmark, kept free on all sides.
- **Minimum size:** 24px height for the icon-only mark on screen; 20mm for print.

Don't:

- Do not stretch, skew, or rotate the logo.
- Do not recolor the mark outside the approved palette below.
- Do not add drop shadows, outlines, or bevel effects.
- Do not place the logo on a busy background without the frost-white containment area.

6.2 Color System

Deep Teal — primary #0F4C5C	Teal — secondary #2E6E7E	Aqua — accent #6FA8A8	Pale Aqua — accent #A8C5C1	Mist — background #DDEAE8	Frost White — background #F4FAFB
---------------------------------------	------------------------------------	---------------------------------	--------------------------------------	-------------------------------------	--

Deep teal is the dominant brand color for logotype and primary UI chrome. Teal supports secondary headings and iconography. Aqua and pale aqua are for accents, charts, and highlight states only — never for body text. Mist and frost white are the only approved backgrounds.

6.3 Typography

ROLE	TYPEFACE	WEIGHT
Display / headlines	Clash Display	Heavy
UI labels & precision copy	Inter	Semibold

ROLE	TYPEFACE	WEIGHT
Body copy	Inter	Regular

Headlines are always set in Clash Display Heavy for confident, geometric impact. All supporting UI and body text uses Inter, keeping the system calm, neutral, and highly legible at small sizes.

6.4 Voice & Tone

Every piece of TRACE copy is written against four pillars:

- **Understand** — translate the science, never lecture with jargon.
- **Research** — back every claim, but qualify AI-generated results (“estimated”, “detected”) rather than stating them as absolute fact.
- **Protect** — frame action around bodily autonomy and local biodiversity, not blame.
- **Together** — foreground community and collective progress over individual guilt.

Tagline usage: “Understanding Microplastics. Taking Action.” always appears in full beneath the primary lockup on first use per document or screen; it may be shortened to “Taking Action.” only in space-constrained contexts such as social media avatars.

6.5 Imagery Style

Photography and illustration lean into a “premium biohacking tool” aesthetic — sleek, clinical, water/particle motifs, spectral-scan visual effects — deliberately avoiding the muted, earthy look typical of environmental NGOs. Persona photography should represent the target demographic (16–30, urban, Cairo-based) authentically.

6.6 Application Reference

Full-resolution examples of every application below are maintained in the master visual deliverable, *Trace Presentation.pdf* (Brand Identity & Strategy Presentation): business card, mobile app screens, website, social media feed, and merchandise line.
