SUPERVISOR	Dr. Suzan Farahat
SOURCE MATERIAL	Project Proposal.pdf, Trace Presentation.pdf (Brand Identity & Strategy Presentation)

Understanding Microplastics. Taking Action.

5.1 Design Review Process

This section replaces “Testing & Quality Assurance” from the standard software documentation guidelines. There are no test cases, automated tests, or bug reports for a design system — instead, quality is verified through iterative design review, a brand consistency audit, and an accessibility check, with supervisor sign-off gating each of the five milestones in Document 01, §1.2.

5.2 Logo Design Iteration Log

The final mark went through three documented rounds of concept exploration before selection, with two additional divergent concepts tested and archived for tone comparison.

ROUND	CONCEPT	PALETTE	OUTCOME
Round 1	Microscope integrated into the “A” of a condensed sans wordmark	#006884 / #FFFFFF / #7FD3E0	Typographic treatment (condensed, heavy) carried forward
Round 2	Circular wave-and-magnifier icon, bilingual EN/AR wordmark	#0E2A3B / #2B8CBE / #7FD7DC / #FFFFFF	Strong bilingual proof-of-concept; icon flagged as too detailed for small-size use
Round 3 (selected)	Particle-core arch “A” — dissolved microplastic particles inside the letterform	#2B8C8E / #0E2A3B / #7FD7DC / #FFFFFF	Closest match to the “premium biohacking” brand strength; simplified for icon-only use

Two further divergent concepts were explored under working names and archived rather than developed: a “Troce” wordmark (circular search/growth icon, navy/cream/green palette) and a recycling-bottle-shaped “A” (black/white/green palette). Both tested a more generic eco-brand tone and were set aside in favor of Round 3's closer fit to the “premium biohacking tool, not a standard eco-NGO” brand strategy.

WHY THIS REVIEW MATTERS

“Flagging too much without cheap fixes causes eco-paralysis” — a risk on record since the SWOT analysis. Every consistency check below exists to keep it from reaching a shipped screen.

5.3 Brand Consistency Audit

Checklist applied across every finished touchpoint before it was considered final:

CHECK	RESULT
Logo lockup matches the approved Round 3 mark exactly (no re-drawing or substitution)	Pass
Color values match the documented hex palette (Document 03, §3.4) on every asset	Pass
Tagline “Understanding Microplastics. Taking Action.” present and correctly cased	Pass
Typography matches the Clash Display / Inter system on every screen and printed asset	Pass
Bilingual (English/Arabic) copy proofread on business card and merchandise	Pass

5.4 Accessibility Check

Contrast pairs validated against WCAG AA minimums (4.5:1 for body text):

FOREGROUND	BACKGROUND	RESULT
#0F4C5C (Deep Teal text)	#F4FAFB (Frost White)	Pass
#FFFFFF (White text)	#0F4C5C (Deep Teal)	Pass
#2E6E7E (Teal text)	#DDEAE8 (Mist)	Pass
#6FA8A8 (Aqua) — accent/decorative use only	any background	Not used for body text

5.5 Feedback Rounds

Each milestone deliverable was reviewed against the log format below. Entries are illustrative of the review cadence used across the project rather than an exhaustive record.

MILESTONE REVIEWED	REVIEWER	OUTCOME
Moodboard & logo concepts (Rounds 1–3)	Dr. Suzan Farahat	Round 3 approved; Rounds 1–2 archived as documented exploration

MILESTONE REVIEWED	REVIEWER	OUTCOME
Mobile app wireframes	Shahd Mahmoud (UX) + supervisor	Approved after simplifying the Scan screen capture-mode selector
Website & social templates	Zeina Mohamed (Visual Design) + supervisor	Approved with no revisions required
Full brand guidelines manual	Full team + supervisor	Approved as the final reference for all touchpoints
